

SaveBoxCU MAX

INDUSTRIAL VENDING MACHINE

The SaveBoxCU MAX locker-type machine's storage units can be combined in different sizes. All devices can be systematically placed and easily accessed in the warehouse or office building. The Scaling System optimizes all of the small, medium-sized or fragile products. The transaction data of SaveBoxCU MAX can be easily customized by our latest developed SaveLog Smart software with various systems and online services.

Why to choose SaveBoxCU MAX?

- Up to 10 machines can be stacked together using a single control unit
- Grants personal access rights per product or project
- Ensures product distribution 24 hours a day, seven days a week
- Creates automatic reports and makes them available for management and maintenance staff
- Easy servicing and refilling process
- Positions can be upgraded with 230V and LAN connector, scale and garment holder frame
- Easy refilling via colour coding system
- Contains numerous configuration options and multilingual user interface
