

SaveSpring MAX

CAROUSEL INDUSTRIAL VENDING MACHINE

The vending machine that can safely store and dispense up to 540 different products at once. It is currently one of the most versatile solutions, as it combines multiple functions and has no issues in expensing products, offering rental, tracking or return of used items. With the background of SaveLog Smart software, SaveSpring MAX records all user transactions, which can be retrieved and filtered afterwards.

Why to choose SaveSpring MAX?

- Product usage can be tracked, a 100% cost control can be achieved
- Up to 10 vending machines can be grouped together using a single software
- Perfect for storing fragile, heavier or liquid products
- Due to the special design of the door, products do not fall during the dispense
- Has extremely versatile configuration and charging options
- The height of the doors can be adjusted to the size of the products
- Ensures product distribution 24 hours a day, seven days a week
- High level of security and ease of use thanks to the new T-door handle and master key locking system
- Easy refilling via color-coded system
- Contains numerous configuration options and multilingual interface
- Has many configuration options and multilingual user interface

What can be stored in SaveSpring ?

Tools

Safety goggles

Gloves

Small parts

Protective masks

Drill bits

Technical parameters

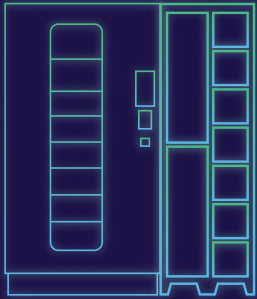

Size: (WxDxH) 944 x 1830 x 965 mm
Weight: 350 kg
Power requirements: 110-240V / 50/60 Hz

Base colour: RAL7012 grey
Maximum capacity: 540 positions or 540 types of products

VERSATILE FUNCTIONALITY

SaveSpring MAX alone is capable of expensing, renting (even pre-booking) and returning products, as well as collecting used equipment. The collect-back function enables the collection and storage of used or contaminated products. As a result, some product sites may operate as recycling positions. For example, one product location can be set up for rent only, while another can only be set up to rent and return the rented products later.

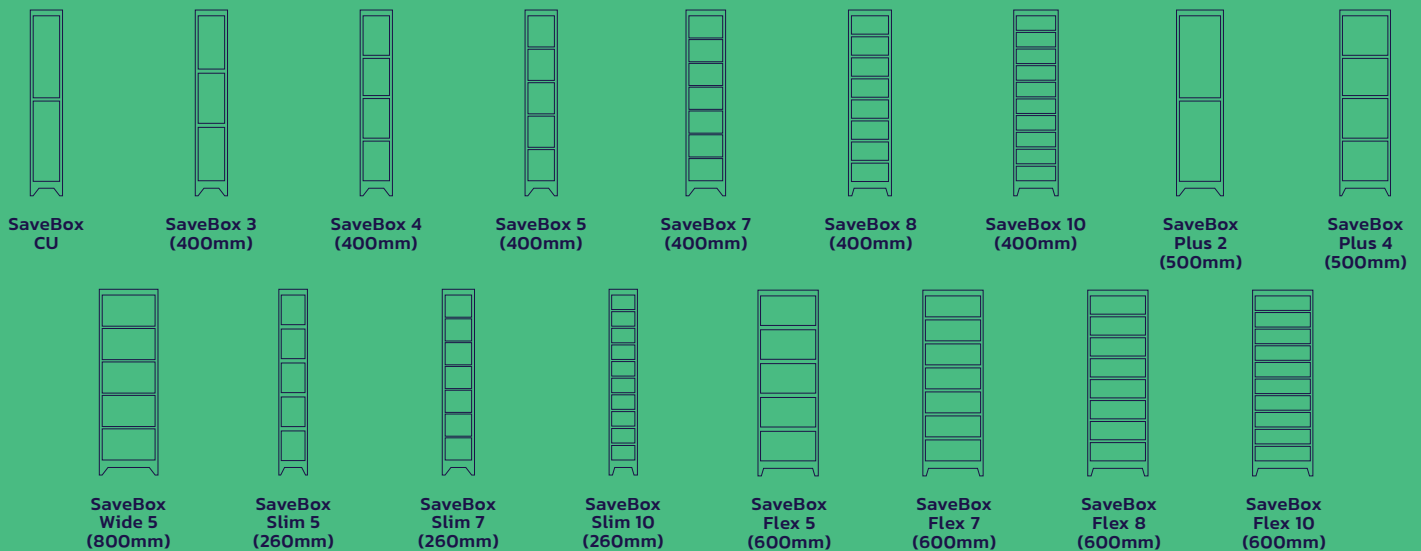

COMBINABILITY

According to individual needs different sizes and numbers of SaveBox and SaveReTurn units can be connected to the SaveSpring MAX vending machine.

WE THINK IN SYSTEMS!

Our SaveSpring MAX vending machines are controlled by our latest developed sophisticated software, SaveLog Smart. SaveLog Smart runs on Google Cloud and enables optimization of SavePro MAX, SaveBoxCU MAX and SaveSpring MAX vending machines in addition to an enterprise-wide integrated solution.

SaveBox variations

WHY SAVELOG SMART SOFTWARE?

- New functions based on user demand can be easily developed
- Provides search and filter options throughout the whole application
- Centralized product management and function-specific configuration is possible
- Sends real-time warnings and alerts
- It is easy to integrate into other systems and online services
- Transaction data can be accessed instantly from anywhere and anytime
