MAX LINE

Business efficiency at the highest level!

**TAKE YOUR RESULTS TO THE NEXT LEVEL WITH
IVM MAX LINE VENDING MACHINES**

OUR VENDING MACHINES

SavePro MAX

Our top vending machine offers a highly optimizeable, complex solution in inventory management processes. We recommend SavePro MAX for companies where a wide variety of production and safety equipment is used. The tools are easily accessible, their use can be tracked and they are available 24 hours a day. Cost reduction is achieved quickly, our SaveLog Smart software makes accurate search and filtering options visible with easy-to-integrate individual functions and complex product management.

SaveSpring MAX

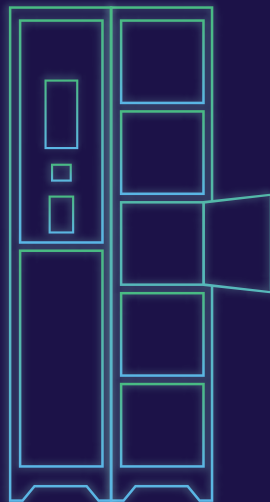

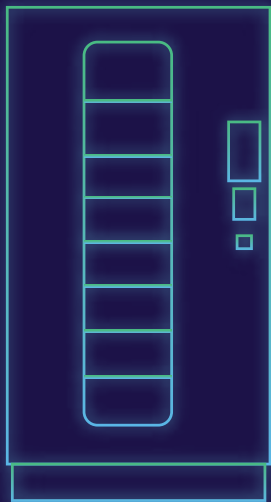

The vending machine that can safely store and dispense up to 540 different products at once. It is currently one of the most versatile solutions, as it combines multiple functions and has no issues in expensing products, offering rental, tracking or return of used items. With the background of SaveLog Smart software, SaveSpring MAX records all user transactions, which can be retrieved and filtered afterwards.

SaveBoxCU MAX

The SaveBoxCU MAX locker-type machine's storage units can be combined in different sizes. All devices can be systematically placed and easily accessed in the warehouse or office building. The Scaling System optimizes all of the small, medium-sized or fragile products. The transaction data of SaveBoxCU MAX can be easily customized by our latest developed SaveLog Smart software with various systems and online services.

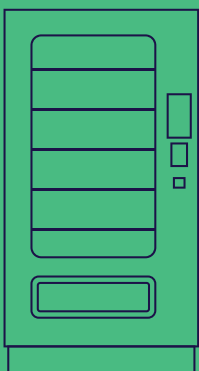

LATEST SOFTWARE:

Our next-generation SaveLog Smart software allows the management of databases – including device usage, employees and their access rights, configuration, expenses, alerts, reports – as well as the use of various functions – sales, exchange, return, rental and sharing, etc. – easily and synchronously.

Within the framework of enterprise-wide integrated solutions, even unique, customized functions can be developed in a time- and cost-efficient way. It becomes measurable and traceable which employee withdrew exactly which devices on what purpose and what quantity from the vending machine. All operations are logged, which can be retrieved over time. Data access is mobile-optimized, vending machine monitoring alerts and warns in real time.

THE LATEST SOFTWARE & INTERFACE

The interface of the SavePro MAX, SaveSpring MAX, SaveBoxCU MAX vending machines handles easily all of the functions. According to their entitlement, employees have access to the tools they need for their work.

CLOUD STORAGE

Make data analysis more flexible and secure at the highest possible level. The transaction data of our vending machines can be quickly and easily filtered according to the needs of your business without the need of a server on cloud basis. Employees will have instant access and sharing anytime, anywhere with an internet connection.

WHY IVM?

INNOVATION
